Re: 347 Ayrault Road (Tax parcel 165.15-1-28.11)
Letter of Intent – Request for Rezoning

Dear Supervisor Hanna:

On behalf of our client, Taylor the Builders, we are respectfully submitting a Rezoning application for the next available Town Board meeting regarding the construction of a 43-unit +/- townhouse project at 347 Ayrault Road.

Existing Conditions

The subject property is currently undeveloped land, zoned Residential Class B, and it is located on the south side of Ayrault Road (CR-21) opposite Jefferson Avenue. It is immediately adjacent to the Erie Canal, which is listed on the State and National Register of Historic Places (2014) and is a National Landmark (2017).

Proposal

The proposal is to change the zoning classification from Residential Class B to a TH Town Home District to facilitate development of for sale townhomes consisting of 10 +/- buildings with three to five units in each. The townhome units will be a mix of one and two stories, 1,250-1,600 +/- square feet with an attached two car garage. Additional parking will be constructed throughout the property to accommodate guests. With the project having direct access to the canal path it will provide a great opportunity for recreation and provide a huge amenity for the residents.

The project includes the installation of the required utilities and infrastructure, an internal sidewalk system, a stormwater management area, and ample landscaping to meet the screening and buffering requirements of the Town Code.

The site will promote walkability and access to the Erie Canal-Heritage Trail on Ayrault Road contiguous to the subject property, and boating opportunities at the nearby Erie Canal Boat Launch located on the east side of the canal.

Town of Perinton
347 Ayrault Road
Letter of Intent – Request for Rezoning

The project will not have a detrimental impact on the neighborhood due to its location, nature, or magnitude of use or due to inadequate access to the property. The site has been designed to provide ample screening and buffering for adjacent properties and will provide 4.3 +/- acres of greenspace (63% of the site). The right-of-way along Ayrault Road and the slopes of the Erie Canal property are heavily vegetated such that the subject property is not visible from either the street or the Canal. There will be minimal disturbance to these areas as they are not on the subject property. Regarding the periphery of the property to transition existing and proposed grades may result in some tree and brush removal, but clear cutting is not anticipated.

Zoning Analysis

The current zoning classification of the property is Residential Class B. The subject property is surrounded by Residential Class B to the west and south, Class APT to the North, and it has the Erie canal to the east. This property is located on the edge of the Residential Class B zoning cluster, which currently permits single and two-family housing, public grounds and buildings, and bed-and-breakfast establishments. In accordance with the town code town homes are only permitted in Residential Class B if the property contains 40 acres or more of developable land.

The proposed TH Town Home District permits Town Home projects on sites that are less than 40 acres. The TH District does not permit any other use other than townhomes. The proposed project aligns with similar TH districts in terms of size and density across the town. This project has a density of 6.8 units per acre which is well below the 8.0 units per acre allowed by code. The rezoning of this property will facilitate development that is compatible with the character of the surrounding residential area, and it will provide a much-needed diverse housing choice in the community.

Comprehensive Plan

The Town of Perinton Comprehensive Plan (2021) devotes an entire policy area to Land Use and Community Character, noting that diverse housing options are needed to retain and attract residents. One of the goals of this policy area is encouraging the development of a range of housing options to support a diverse population. Our proposal is supported by the first action stated under that goal which is to review and implement zoning changes to allow for a mix of housing and densities. The proposed townhouse community is consistent with the policy goals of the Comprehensive Plan, which is to facilitate development that provides quality, diverse, housing choices and price ranges to support residents who may want a low-maintenance option such as a town home.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Project :

Date :

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: ☐ Type 1 ☐ Unlisted

Identify portions of EAF completed for this Project: ☐ Part 1 ☐ Part 2 ☐ Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information
Site Plans, Elevations

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Town of Perinton Planning Board _____ as lead agency that:

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
