

The Town recently installed a new 15” gravity sewer between Ayrault Road and Pebble Hill Road within the RS&E Trail corridor. This eliminated a high maintenance 50-year-old pump station and 4,000 LF of aging force main and significantly improved the resiliency of the Perinton Consolidated Sewer District infrastructure.

Items to be Completed in June 2024:

- Replace deteriorated manhole in Pebble Hill cul de sac
- Replace landscape plantings that didn’t survive winter
- ✓ Regrade swales along trail as needed to ensure proper drainage – *completed*
- ✓ Review entire corridor to ensure proper grass is established and re-hydroseed as needed – *completed*

Items to be Completed by Fall 2024:

Install additional landscape plantings between Ayrault and Pebble Hill Road
